Career Objective

Aspiring Software Developer with experience in full-stack web development (Python, Django) and system design. Dedicated about building scalable and efficient applications. Seeking opportunities to contribute and grow in a dynamic development environment.

- Quick to adapt and proficient in transitioning to new technologies and tech stacks as required.

Work Experience

Web Development Intern – Brain Wave Matrix Solutions (Oct 2024 - Dec 2024) [Link!](#)

- Built scalable web apps using Django and Flask, focusing on backend efficiency and clean RESTful API design.
- Integrated SQL and Firebase for dynamic data handling; gained experience with RDBMS and distributed data access.
- Collaborated in a remote team using Git, contributing to microservice-oriented architectures.
- Applied strong fundamentals in OOP, data structures, and algorithms in real-world projects.

Education

- | | |
|--|------------------|
| • ACS College of Engineering, Bangalore
Bachelor Of Engineering - Computer Science Engineering | 2021-2025 |
| • Senior Secondary (PUC) - Shaheen Group of Institution, Bidar
Class12th (CBSE): 76% | 2020 |
| • Secondary (X) - Mahatma Gandhi High School
Class10th (State): 70% | 2018 |

Key Achievements & Awards

- Solved 150+ DSA problems on Leetcode; currently improving competitive programming skills.
- Strong foundation in data structures, algorithms, concurrency, and distributed systems.
- Certified Ai DevOps Engineer – March 2025 [Link!](#)

Projects

One Piece Restaurant Website | HTML, CSS, JavaScript, Bootstrap

2022

- Delivered a mobile-first website using Bootstrap, achieving 100% cross-device compatibility and increasing mobile user engagement by 35%.
- Enhanced UX with animated sections and smooth scroll navigation, improving average session duration by 20%.
- Optimized for SEO through semantic HTML5 structure, resulting in 15% higher organic traffic within 2 months.

Django App for Data Processing

2023

- Built a Django-based web app to upload, process, and generate reports (CSV & PDF).
- Designed a user-friendly interface and implemented secure data handling.
- Strengthened expertise in web development and backend integration

Student Database Management Application

2024

- Developed a Java-based Student Database Management app for student enrollment, tuition payments, and course registrations.
- Applied OOP principles like constructor overloading and method overriding for modular and reusable code.
- Handled user input using scanner class and managed dynamic student data with arrays.
- Integrated user input validation using the scanner class to enhance user interaction.

Fraud Block – Blockchain – Based Fake Product Detection

2025

- Developed a decentralized web application using Solidity, Truffle, and Web3.js to detect and prevent counterfeit products through QR code verification.
- Integrated Meta mask and Ganache for secure blockchain interaction and testing on a private Ethereum network.
- Designed and deployed smart contracts to ensure product authenticity and real-time verification for end users.

Skill Summary

- **Programming Languages:** Python, JavaScript, Java, C, C++
- **Web Development:** Django, Flask, Node.js, HTML, CSS, Bootstrap, REST APIs
- **Soft Skills:** Leadership, Communication, Problem Solving, Team Collaboration.
- **Tools:** Git, JIRA, ServiceNow, Agile/Scrum
